California Water Law & Policy

Dear Colleague,

We are pleased to invite you to attend Argent Communications Group's 2019 annual California Water Law & Policy Conference.

California's water law and policy remain moving targets of ever-changing issues, and this year several topics have garnered our attention. Following years of low rainfall, this year California's snowpack is high, and reservoir water abundant. This brings up concerns about water rights and water-rights reporting; and how near- and far-term plans are addressing future water supply, drought and flood control issues.

The federal Clean Water Act and its jurisdictional reach has become quite uncertain, despite efforts by the U.S. Army Corps of Engineers to define the issue. And while the federal government tries to reign in the reach of the CWA, the State Water Resources Control Board is simultaneously moving to expand its reach into water quality regulation.

We're also covering other timely issues of growing concern: the critical implications of changes to managing the Colorado River; ongoing SGMA compliance issues for groundwater sustainability plans (GSPs) and the unique challenges involved with critically over-drafted water basins; San Francisco Bay/Sacramento-San Joaquin Delta water quality, habitat restoration, and the ever-changing WaterFix Project; whether or not to tax water in an effort to insure a clean water supply statewide; movement regarding the scope of the Public Trust Doctrine; and the unique challenges of a newly legal cannabis industry in the state facing water supply and quality issues.

Our conference is designed to hone in on the issues that will most impact your water-related practice and the governance of water in the state. As an attendee, you will gain practical knowledge on the legal, policy, and technical sides of the issues from our outstanding faculty from federal and state regulatory agencies, the academic community, water supply agencies, engineering consultants, and top water attorneys from throughout the state. Over the two days, you will also have invaluable networking opportunities with the faculty and your colleagues.

Be sure to register today for this informative conference and find out what impact these critical topics will have on each other—and how the potential outcomes will impact your practice, agency or organization in the future.

Sincerely,

Steven Anderson, Esq., Program Co-Chair
Best, Best & Krieger, Riverside

Meredith Nikkel, Esq., Program Co-Chair
Downey Brand, Sacramento

4:00 Adjourn

Conference Co-Chairs:

Steven Anderson focuses on environmental, water and natural resources law, including practice under the Endangered Species Act, Clean Water Act, and state water quality and water rights laws.

Meredith Nikkel advises clients on water law issues in all aspects of water supply development and management and serves as special and general counsel to cities, counties, and special districts.

Program Keynote:

Ernest Conant is the Regional Director, Mid-Pacific Region, of the U.S. Bureau of Reclamation where he manages one of the nation's largest and most complex water systems. Previously, he served as senior partner of Young Wooldridge, LLP, where he negotiated major water agreements and lead water banking and other storage initiatives.

Conference Faculty:

David R.E. Aladjem represents water districts, cities, counties and private companies regarding water rights, water transfers, and the conjunctive use of surface water and groundwater.

Craig Altare is a hydrogeologist who advises the Department of Water Resources on sustainable groundwater management.

Michael Anderson, Ph.D., advises the Department of Water Resources on climate, climate change, and water supply patterns.

Alexandra Arboleda practices water rights and natural resources law representing clients in general stream adjudications, Colorado River, surface water, and groundwater issues.

Catherine Cavanaugh is Staff Counsel and works on a broad range of issues impacting statewide water management.

Alex DeGood advises developers, public agencies and elected officials on zoning, environmental compliance, and litigation under municipal and land use law.

Jessica Diaz represents clients in water rights litigation, water regulation compliance, public law issues, and land use issues.

John Freshman advises clients on legislative, regulatory and permit problems and strategies for overcoming those problems.

Derek Hoffman assists developers, farmers, water districts, water companies and business entities in water law and water rights, mining, real estate, business and eminent domain.

Joshua Israel, Ph.D. works in fish and water management interactions, conservation genetics of migratory fishes, and adaptive ecosystem management.

Kevin Kelley served as the General Manager of the largest irrigation district in the country until November 2018 when he announced his retirement.

Nicole Kuenzi counsels SWRCB members and staff on matters related to water rights, drought response, and groundwater.

Serena Liu is a State Water Resources Control Board attorney at the California Environmental Protection Agency.

Wesley Miliband practices in the area of water resources including securing and protecting water rights and water supplies, water transfers, and compliance for water infrastructure.

Andre Monette works with water districts, cities, counties, agricultural interests, and private entities on matters involving the Clean Water Act and its state law analogues.

Daniel O'Hanlon focuses on environmental law including litigation, counseling and permitting in the areas of water, contaminated property, endangered species, and wetlands.

Timothy O'Laughlin advises clients on water, land use, and the environment and has extensive experience as general counsel to public agencies.

Kristin Peer works to restore, protect and enhance the environment at the California Resources Agency.

Julé A. Rizzardo, PE, PH, administers water rights, considering water availability and flows needed to protect public trust resources.

Scott Shapiro advises clients through regulatory, contractual, financing and legislative challenges, with a special focus on massive flood protection improvement projects.

Michele Staples advises agricultural businesses, developers, and water suppliers on processing entitlements, environmental compliance, water rights, water quality, and endangered species issues.

Barton H. "Buzz" Thompson, Jr. is Professor of Natural Resources Law and the Director of the Woods Institute for the Environment.

Cindy Tuck leads and oversees ACWA's Government Relations Team, which includes the Federal and State Relations Departments.

Mark Van Camp, PE, heads the firm's water rights group, providing consultation on water rights, hydrology groundwater and project feasibility.

Stephan Volker practices environmental litigation, including water quality standards for the Bay-Delta ecosystem.
